

**Thank You for considering the *Utah Biodiesel Cooperative* for your grease-collection needs.**

**General Information:**

Our Cooperative will collect your grease to brew biodiesel, a 100% safe environmentally-friendly alternative fuel that can be run in diesel vehicles. Your donation is **100% tax deductible** as our parent organization, Greener Solutions, Inc., is a charitable organization under 501(c)(3) status.

**Collection Information:**

The Utah Biodiesel Cooperative will drop off barrels which we will leave at your location. When your barrels are  $\frac{3}{4}$  full of grease, simply call us (the phone number is painted on the side of the barrel) and we will come collect it within 24-48 hours.

Our collection is not only extremely reliable, but best of all, **it is free**. And because we are a not-for-profit organization, you can take a tax deduction for your grease at **fair market value**. This means that having the Utah Biodiesel Cooperative collect your grease is not only **good for the environment**, but it can actually **make you money**.

Your grease will be collected by members of our cooperative who live near you, so you are also helping your community as well.

If you have any questions at all, feel free to call us at anytime at (435) 631-0021.  
Thanks!
